

INSTRUCTIONS:

1. cut out a piece of tracing paper a little smaller than a regular 8.5x11 printer/copy paper
2. tape the tracing paper to the regular printer paper
3. load into printer (I used the top feeder), and print
4. cut out each wrapper following the black outline (I cut mine just past to remove the outline)
5. sew each wrapper to a square piece of parchment or tracing paper to make a closed arch shape
6. cut out along the edge
7. put the seed pop in the wrapper and tie around the stick with a string to secure.
